AB - SU1557127 Addn. of HCl (I), glycerine (II) and lignosulphonates (III) to the binder for concretes, improves its properties. The mixt. contains (in wt.%): Portland cement 33.5-98.7, bauxite sludge . 0.1-60, (I) 0.5-3, (II) 0.5-3 and (III) 0.2-0.5. The binder needs 23.1-26.3% water and develops compressive strength of 30.2-45.7 MPa.
- ADVANTAGE - Increased activity, reduced water consumption. :
Bul.14/15.4.90 (2pp Dwg.No. 0/0)

IW - BIND CONCRETE CONTAIN PORTLAND CEMENT BAUXITE SLUDGE HYDROCHLORIC ACID GLYCEROL TECHNETIUM LIGNOSULPHONATE IMPROVE PROPERTIES
